

# THE CHANCE FOR CONGRESS TO ACT IS MELTING AWAY

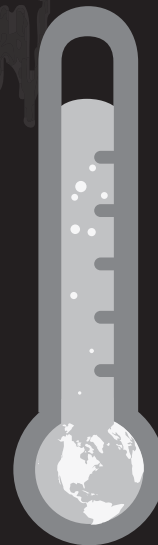

- The last decade, 2000-2009, was the hottest decade on record
  - The past 12 months were the hottest year-long period on record
  - This past June was the hottest June on record
- ... but climate change is a hoax because it snowed this winter???

## MAKE THE SENATE FEEL THE HEAT

Where are the climate deniers now? Their lies and misinformation are melting away like an ice sculpture in the hot July sun.

The science is sound: 5 independent panels have cleared the scientists involved in the so-called Climategate "scandal".

The facts are clear: We need the Senate to pass a comprehensive clean energy & climate bill. Stop denying our clean energy future.

**CO<sub>2</sub> NSEQUENCE**  
CLEAN ENERGY JOBS NOW. OR PAY LATER.
